## Notice of Availability to Review Proposed Plan for Addressing Contamination at Installation Restoration Site 33 at Marine Corps Base Camp Pendleton

Marine Corps Base Camp Pendleton invites the public to comment on the Proposed Plan for Installation Restoration (IR) Site 33. The Proposed Plan identifies the preferred alternative for addressing contaminated groundwater at this site and provides the reasoning for this preference. The Proposed Plan is part of the IR Program, a Department of Defense program for investigating, characterizing, and cleaning up soil and groundwater contamination resulting from past years of operation at military bases.

The preferred cleanup alternative for this site is considered the best approach to protect the public and the environment and comply with regulatory requirements. The regulatory agencies reviewing the IR Program concur with this preferred alternative. The agencies that oversee the IR Program are the USEPA, California Regional Water Quality Control Board, and the California Department of Toxic Substances Control.

Copies of the Proposed Plan will be available during the public comment period at the MCB Camp Pendleton Information Repositories:
